Having an excellent track record towards providing financial institutional, exchange companies, private and govt. sector with banking equipment and office automation products for the last 28 Years, we take the pride in providing uninterrupted and excellent after sale support in operation, delivery and services of the installed units with minimal downtime.

Our service and support center will satisfy any need with a great force of technical staff to cater for any business requirement and support makes the company unique in its features having a base of satisfied privileged clients.

We at NOS are proud of representing many of the most prestigious brands in the field while providing the best technical support that could be delivered by our well trained technical team that consists of the best technicians and engineers.

OUR SALES TEAM

To grow our business we are represented by credible and committed sales teams around the country striving to best accommodate our clients with the best and up to date solutions that meet their needs. Our sales executives and managers pride themselves on building long-term and mutually-beneficial relationships by listening and responding to the changing needs of their professional customers.

OUR MAINTANANCE TEAM

We offer you a team of skilled and qualified trades' operatives who know and understand the customers' needs and embrace the power of exemplary service, allowing us to directly control work priorities, quality and customer service.

We train our staff to operate safely, meet agreed quality standards and to be sensitive to the customers' circumstances.

24/7

We provide a 24 hour, 7 days a week emergency service – essential for those emergencies when you need a quick response and a problem sorted.

PRODUCTS

Innovative, secure, trustworthy, robust, reliable are all words used to describe our product portfolio. Developed over many years in partnership with our customers to ensure they are fit for purpose.

With over than 28 years of experience to improve the efficiency of our customer's processes, we have an enviable product range that meets today's business requirements.

BANKING TECHNOLOGIES

CASH HANDLING SOLUTION

With a wealth of experience in cash counting & management systems for major retailers and banking institutions throughout the region, we specialize in tailored solutions and will recommend a package that will maximize the use of resources and minimize overhead lost to daily cash operations.

The combination of our suppliers' advanced technology and our industry and markets' knowledge ensures that our solutions make cash handling easy and economically viable. As cash remains a popular and enduring payment medium, the continuing challenge is to find new solutions to enhance cost-effective cash handling.

BANKNOTE SOLUTIONS

Our banknote product range include highly versatile machines and offers a wide selection of functions for counting, sorting and identifying damaged and counterfeit bank notes.

COUNTERFEIT DETECTORS

Ultraviolet and Infrared viewing detectors which are intended for visual authenticity control of banknotes and cheques. While everything points to an increase in this sort of problem. Let us help you fight the counterfeit problems!

DORS   **SCAN COIN**

CURRENCY COUNTERS / SORTERS

We pride ourselves on our innovation and technical development to bring products to market that make people and businesses more efficient and productive. This saves time and money and lets people do other tasks more directly related to their business.

BANKNOTE CENTRAL PROCESSING SYSTEMS

High-quality banknote sorting systems that are able to meet the highest demands of every type of cash centers. The systems for processing, sorting and assessing the authenticity and condition of banknotes are continually adapted to meet market demands and security requirements.

PACKAGING EQUIPMENT

Following the counting, sorting and inspection of the banknotes the bundles need to be held together securely. We offer a fine range of equipment for the following special applications: The Bundling machine bundles piles of banknotes with paper band ready for unit packages of 10 bundles for transportation, storage and easy handling. To make the unit packages we offer different types of Strapping machines.

Extra security (tampering, moisture etc.) can be reached by Vacuuming or heat-Shrinking.

INDUPRO

ATS Unique Banding

BANKNOTE DESTRUCTION SYSTEMS

We offer a range of flexible solutions for the fully-automated and secure destruction, conveying and collection of unfit banknotes and secure documents. Each system is designed and built to meet your precise needs; demonstrating a flexible workflow design and configuration, ensuring operational security and providing total confidence in secure note destruction.

KUSTERS ENGINEERING

COIN HANDLING SOLUTIONS

We offer a variety of different coin solutions. They count, verify and bag coins or tokens. Our products are well known for its world-leading sensor technology to identify foreign, damaged or counterfeit coins.

Our range of coin handling equipment has a very simple aim: Help our customers handle large volumes of loose coins in an efficient, secure and ergonomic manner. It's as simple as that. Our range of equipment for this type of operation consist of a number of modules with different options - all to ensure that the solution we offer is perfect for your needs.

COIN COUNTERS

Coin counters verify and count the number of coins or tokens, this type of machines works with a manual setting to identify the thickness and diameter of the coin. None conform coins, counterfeits or damaged coins are off-sorted.

SCAN COIN

VALUE COUNTERS

Value counters quickly count the value of mixed coins, without separating them. In effect, it is a coin counter, but with the additional feature of giving you the value of the batch. The patented electronic sensor technology ensures the highest possible counting accuracy.

SCAN COIN

COIN SORTERS

Coin sorters count, sort, verify and bag coins or tokens. Our coin sorters give you the freedom of counting and sorting several different currencies at the same time. All coin sorters include the unique electronic counting sensor technology and some also contain the patented Active Sorting® technology, which means that the machine carries on working even when a bag is full.

SCAN COIN

COIN CONVEYOR SYSTEMS

In large cash center operations where the coin volume often is very high, it is vital to have efficient systems. Since the environment traditionally is noisy, rough and full of heavy lifting, a lot can be done to relieve your staff and increase security, accuracy and efficiency.

COIN PACKAGING EQUIPMENT

When the coins have been verified, counted and maybe sorted you have the option to package them. For most businesses the coins are easier to handle if packaged - either in rolls, sachets or boxes.

VERIFYING EQUIPMENT

Sometimes you need that extra verification after handling your coins. A checkweigher system is an easy solution to make sure your packages contain what they should, and also mark them properly.

SCAN COIN

CHEQUES' TECHNOLOGIES

Magnetic Ink Character Recognition (MICR), a technology invented in the 1950s has allowed financial institutions to streamline their cheque processing. The characters are printed with special MICR Fonts and are known as MICR Characters, which must be printed with MICR Toner or MICR Ink. It is the combination of Toner and Fonts that create the machine readable MICR line.

We provide banks with the technology to process cheques at a rate that is more reliable than any other technology. It also includes guidelines to ensure production ofconsistently readable MICR characters.
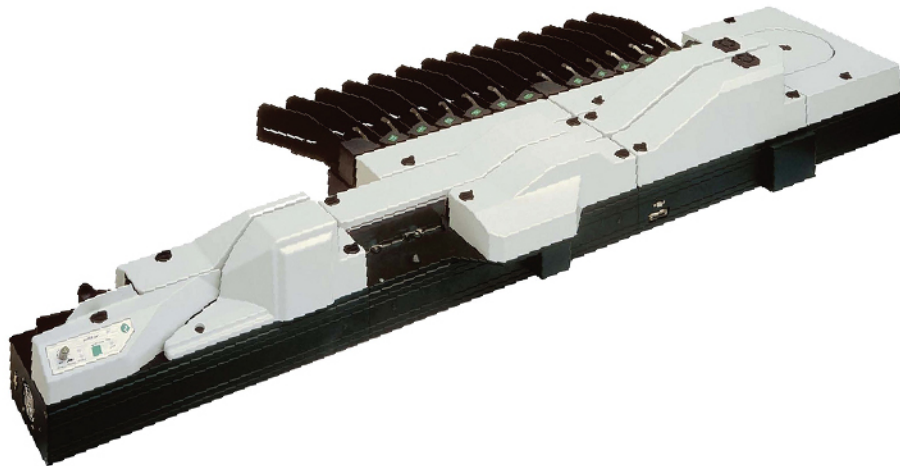

CHEQUE BOOK PRODUCTION SYSTEMS

The cheque book dispenser is designed specifically for theproduction of cheques/cheque books from cheques "blanks" containing all background and non-variable information; all variable information being provided

ROTOTYPE INTERNATIONAL

LOOSE CHEQUES PRINTING SOLUTIONS

We offer application software, security printing hardware and specialized consumables for securely printing cheques, money orders, transcripts, prescriptions and other important documents.

Our solutions are used by small and medium size businesses as well as large enterprises and governmental organizations to manage fraud, operational risk and comply with government regulations related to protecting information privacy.

CHEQUES' PROCESSING SYSTEMS

An advanced modular system with high performance created to process several kinds of documents, such as bank cheques, payment vouchers, postal payment forms, restaurant tickets, coupons, etc.

It can automatically feed, read, encode, cancel, print, scan front/rear, and sort.

CHEQUES & MAGNETIC CARDS READERS

An easy-to-use product that combines affordability and reliability with high quality and performance.

A magnetic cheque and card reader that can adapt to a variety of applications, enabling retail and financial transactions to reduce fraud, increase clerk efficiency, as well as enhance customer services.

CHEQUE SCANNERS

Designed to simplify the processing of cheques and other documents at the point of presentation.

This unique reader scanner is the logical development to provide the functionality and performance normally found in devices too big for modern teller positions in a unit with a small footprint.

Electronic Cheque Writers

Embossed printing to reduce risk of alteration. Currency codes, commas, decimal point and the other marks can be configured according to the users' needs beforehand. It's an ideal solution for not only commercial but also personal use.

SELF-SERVICE BANKING

Self-service banking increases teller productivity while providing customer convenience. It is configured as a self-service device with remote teller assistance. With the help of video banking solution, branches can be automated and miniaturized, through which banks can expand their service coverage at lowest cost possible. Customers can enjoy banking services anywhere, anytime.
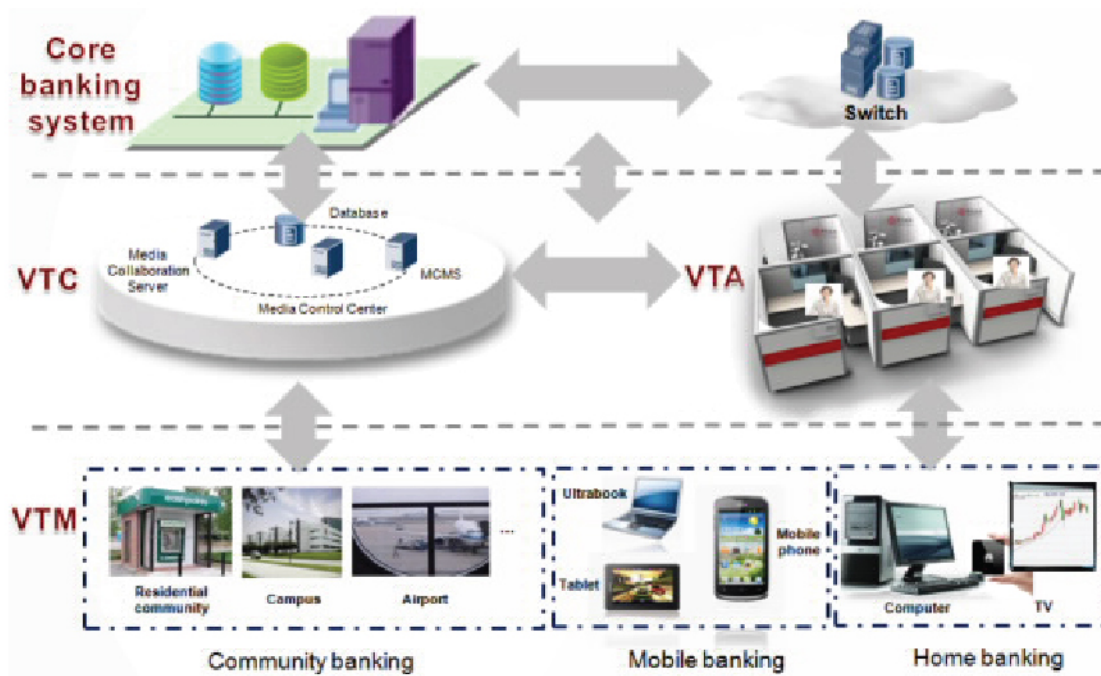

VIRTUAL TELLER MACHINE (VTM)

The VTM banking solution perfectly combines teller and self-services and helps banks improve service operational efficiency, customer satisfaction, and cost effectiveness. The solution brings both technological and service mode innovations and provides the following obvious customer benefits:

• Fast deployment
• Workload migration
• Face-to-face service
• Expert resource sharing
• Service risk reduction

SERVICES THAT CAN BE AUTOMATED

- Advanced, automated indexing capabilities help guard against errors
- Review and correct images with Intelligent Quality Control

CUSTOMER DIRECTING SOLUTIONS

QUEUING SYSTEMS

Control of queues and customer flow are vital parts of every customer service. Using a queue management or combined ticketing system, the customers waiting experience, the efficiency of the workforce and sales can be improved.

Benefits:

- Reduced waiting times

- Reduced administration times

- Increased number of daily transactions

- Increased staff efficiency

- Increased customer satisfaction

- Reduced stress level and number of conflicts

- Increased sales and cross-sales

- Increased staff motivation

- Increased customer loyalty

- Increased revenue and cost effectiveness

DIGITAL SIGNAGE, PROFESSIONAL DISPLAYS AND VIDEO WALLS

Innovative technology of fully integrated LFD solutions to deliver your message and bring your vision to life on the big screen. An unrivalled combination of design and integration expertise, high-quality core professional display and audio systems technologies, and experienced professionals make it all happen.

Digital signage is all around us. It is used in airports, train stations, shopping centers, supermarkets, hospitals, restaurants, schools, public buildings and business premises.

It is used to inform, warn, entertain, inspire and seduce; to generate sales and to provide better customer service. Yet, not every business is making the most of its potential. Many are put off by the perceived complexity of content creation and delivery, the need to purchase extra hardware or the ongoing cost of running and maintaining digital signage.

SAMSUNG

EXCHANGE RATES BOARDS

Our Electronic LED Exchange Rate Board displays use the latest and most cost-effective display technology. They are a great way to help your customers keep informed of exchange rates and movements in the currency markets.

A host of options including various display colors, digit sizes and logo printing.

CURRENCY EXCHANGE KIOSKS

Currency Exchange has never been easier!
Currency Exchange Machine accept banknotes from mixed currencies, like USD, EUR, RMB, JPY, CAD, GBP, etc, and exchange into local currency in banknotes and in coins.

The management software allows the owner to monitor each transaction from remote PC or smartphone.
The benefits for Currency Exchange Machine are:
• Reduced congestion
• Decreased waiting times
• Increased customer satisfaction
• less operational cost
• faster cash flow
